Our Chapter presently consists of a management team approach. The chapter may choose either the traditional board or the integrated management form of governance. Integrated management governance consists of a management team composed of elected and appointed members, including the chorus director

There are 5 elected positions on the Grand Harmony Management Team, and members run for a specific position. The Director is automatically the 6th Team Member. Two other positions may be appointed for specific events and/or occasions, eg. Show Coordinator.

The Management Team is responsible for developing long-range plans based on the goal and values of the Chapter membership. The Management Team develops an appropriate structure of task-oriented groups (teams, committees, staffs, etc.) who are responsible for developing strategies to implement the long-range plans, and the Management Team oversees and evaluates the implementation of these strategies. The Management Team ensures open communication at all levels of the Chapter.
